

MANISH SHARMA

manishsharmadota@gmail.com | +91 6378879085 | github.com/MrMKsharma | linkedin.com/in/manishsharma31

Professional Summary

Motivated fresher and AI-driven developer with experience in DevOps and backend engineering, skilled in leveraging generative AI tools and MCP-based server workflows to build scalable and automated systems. Proficient in Go, Python, cloud (AWS), Docker, Kubernetes, and CI/CD, with a strong focus on integrating AI into modern development pipelines and improving system efficiency.

Technical Skills

Programming Languages: Go (Golang), Python.

Databases: MySQL, MongoDB.

Tools & Technologies: Git, GitHub, Cursor, GitHub Copilot, ChatGPT, Claude AI.

Cloud & DevOps: Linux, AWS, Docker, Kubernetes, Jenkins, GitLab CI, Terraform, Grafana.

Professional Experience

DevOps Engineer Intern

SukhPragya Software Pvt. Ltd.

May 2025 – Jul 2025

- Designed and maintained CI/CD pipelines using GitLab CI/CD for automated build, test, and deployment workflows.
- Implemented Infrastructure as Code (IaC) using Terraform to provision and manage AWS cloud resources.
- Deployed and managed containerized applications using Docker and Kubernetes in production environments.
- Improved deployment efficiency by 90% by automating manual release processes.
- Collaborated with developers to ensure application reliability, scalability, and security.

Open Source Contributor – Hacktoberfest - 2025 (DigitalOcean)

[Digital Badge](#)

- Awarded Super Contributor Badge for impactful open-source contributions.
- Contributed to backend and DevOps-oriented repositories using Git, GitHub, and CI workflows.
- Improved code quality, performance, and documentation through structured pull requests and reviews.

Projects

SafeStep - Durable Execution Engine — Go

[GitHub](#)

- Technologies Used:** Go (Golang), SQLite, Docker, Kubernetes.
- Built a crash-resilient workflow engine in Go with automatic step memoization and resume-from-failure capability.
- Implemented parallel step execution using goroutines and errgroup with thread-safe persistence in SQLite.
- Designed a generic, type-safe Step[T] API enabling reusable and deterministic workflow execution.
- Solved workflow consistency issues using atomic sequence tracking and zombie step recovery logic.
- Created clear documentation for failure scenarios and recovery steps to help users troubleshoot.

Full-Stack Application Deployment using DevOps

- Technologies Used:** Docker, Kubernetes, AWS, Terraform, GitHub Actions, Prometheus, Grafana.
- Architected an automated DevOps workflow leveraging Docker and Kubernetes.
- Provisioned AWS infrastructure using Terraform to support cloud-based deployments.
- Enabled CI/CD automation and system monitoring using GitHub Actions, Prometheus, and Grafana.

Certifications

- GitHub Foundations
- AWS Academy Graduate - AWS Academy Cloud Foundations
- AWS Cloud Quest: Cloud Practitioner
- Microsoft Certified: Azure AI Engineer Associate (AI - 102)

Education

Swami Keshwanand Institute of Technology, Jaipur

2022 – Present

B.Tech in Information Technology

CGPA: 8.0

New Public Sr Sec School, Kota

2021

Class XII (RBSE)

Aggregate: 96.2%

Shri Mahesh Shiksha Sadan Sr. Sec. School, Bhilwara

2019

Class X (RBSE)

Aggregate: 82.8%

Achievements

- Winner in SPHINX Hackathon 2024 by MNIT - Jaipur.
- Student Ambassador of Microsoft Learn Student Ambassador Program (MLSA).
- Top 5 in Smart India Hackathon Prelims 2024, SKIT Jaipur; advanced to Grand Finale.
